Thanks go to all of the seminar speakers and chapter authors who gave generously of their time. Leanne Howard did great work in coordinating the public seminars and collected the book chapters for publication. John Freebairn and Ross Williams from the Faculty of Economics and Commerce helped with seminar planning and organisation. Claire Jennings and Connie Yuen provided administrative and practical support during the seminar series. Robin Garnett helped to prepare the chapters before final edits by myself.

Richard James, Director of the Centre for the Study of Higher Education, conceived the idea for the series, negotiated its support within the university as a cross-faculty project, set the quality bar high, and did much to bring each of the seminars to successful completion. The seminars were supported by \$40,000 from the university that enabled the inclusion of international and interstate speakers, and adequate promotion. We thank Vice-Chancellor Glyn Davis and Provost Peter McPhee for this characteristic indication of their commitment to public engagement and public policy.

We are very grateful to Louise Adler of Melbourne University Publishing for her support for the project, and for her wisdom and enthusiasm; to Foong Ling Kong, who is an exemplary publisher; and to editors Eugenie Baulch and Cathryn Game. It is a delight to work with MUP as part of its flourishing publishing program.
