FOUNDATIONS OF CLINICAL PSYCHIATRY

FOURTH EDITION

Edited by Sidney Bloch, Stephen A. Green, Aleksandar Janca, Philip Mitchell and Michael Robertson

'A rich distillate of wisdom from the custodians of Australian psychiatry' —
PROFESSOR PAT MCGORRY, UNIVERSITY OF MELBOURNE

Foundations of Clinical Psychiatry is the trusted introductory text for students of medicine and other health professions, including psychiatric nursing, psychology, social work and occupational therapy. It has also been a useful reference for family doctors.

This new edition has been revised and updated by five editors, leaders in their fields, in collaboration with a group of expert psychiatrists. The four-part structure—an introduction to clinical psychiatry; conditions encountered; specific patient groups and clinical settings; and principles and details of typical clinical services and treatments—provides a clear overview of clinical practice. It also explores the causes of mental illness and the ethical aspects of its treatment, and covers the full range of psychiatric disorders encountered by health professionals.

Foundations of Clinical Psychiatry emphasises biological, psychological and social factors in assessing and treating patients, includes the integrated use of DSM-5, and provides further reading suggestions. It is richly illustrated with dozens of clinical stories.

Chapters on ethics and the effects of trauma, and a section on the mental health of indigenous people and refugees, also feature in the book.

ABOUT THE EDITORS:
